

KEY FEATURES

- ▶ Streamlined view of your ITAM data
- ▶ Highly configurable to suit your environment and needs
- ▶ Seamless integration with HP Asset Manager

ABOUT RevealIT ADD-ON MODULES

Our add-on modules extend HP product functionality by plugging into and integrating seamlessly with the HP product. Designed and architected by ex-HP R&D personnel, they come with the look and feel of shrink-wrapped software.

With *RevealIT* add-on modules, you no longer have to get locked in to a customized solution with an eternal services engagement.

If you are an experienced HP Asset Manager user, you know that it is a powerful tool for managing your assets. You also know that for the casual user, HP Asset Manager can be overwhelming if all they want is a simple, specific view of the information important to them. They don't want to have to keep coming to you for report specifications; they just want to see what they have in a format that is meaningful to them.

The HP Asset Manager Web Tier is a step in the right direction, but even this can be a challenge for casual users. You need the power of HP Asset Manager, but you don't want that power to become a barrier to acceptance for your end users, in particular the executives who want 'just the facts'. That's where the *RevealIT Asset Viewer* comes in.

Asset Manager Counter	License Rights	Licenses Used	Compliance Position
Microsoft Office 2003 Pro	33	3	30
Microsoft Office 2003 Std	1	3	(2)
Microsoft Office 2007 Pro	10	0	10

What it does

The *RevealIT Asset Viewer* is a streamlined read-only web interface to the HP Asset Manager database. It provides easy-to-access predefined views of asset data without the bells and whistles of the full HP Asset Manager client. It

is highly configurable so you can create screens to suit your specific user requirements and it works irrespective of the customizations to your HP Asset Manager implementation. Using it effectively requires no knowledge of how HP Asset Manager works behind the

Providing Visibility Into IT

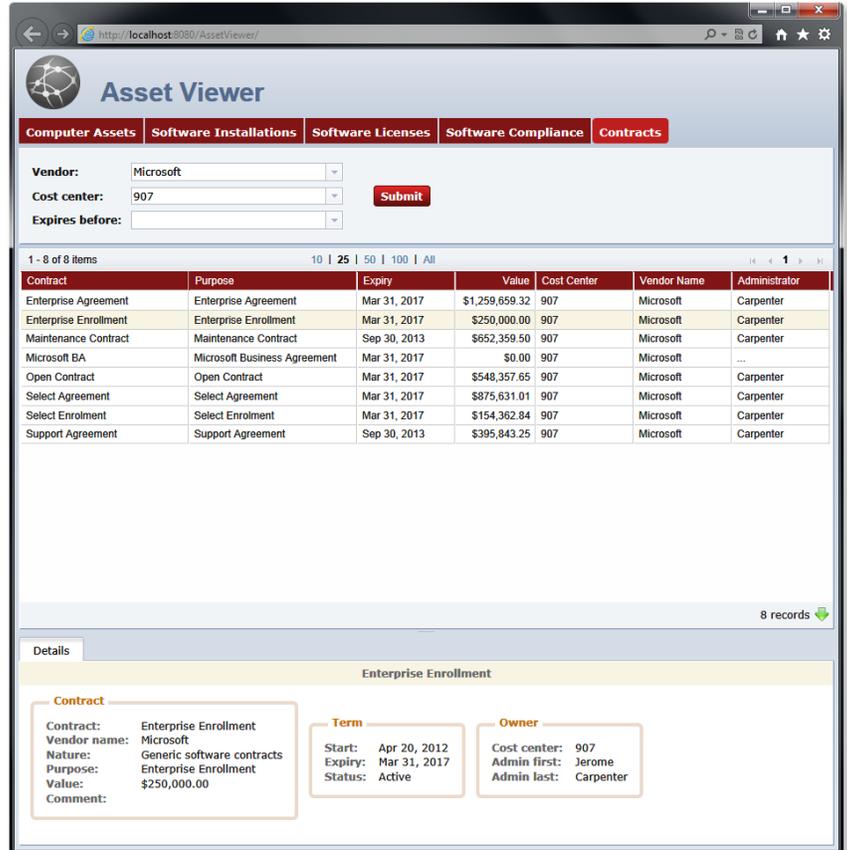

scenes. Since it is not locked in to the HP Asset Manager API, it is possible to create views that would be unwieldy in the native clients. For example, with the Asset Viewer you can have detailed composite views of software counter query results.

Why it is useful

The success of your ITAM implementation is ultimately dependent on how widely it is adopted by your users. A critical element in this is the usability of the interface exposed to your users. With the *RevealIT Asset Viewer*, you no longer have to worry about overwhelming your users with the power of HP Asset Manager and all the data captured within it. This module gives you control over how you present ITAM data to casual users. You can show them just what they want to see when they want to see it in a clean, uncluttered presentation, thereby allowing them to very quickly leverage the HP Asset Manager data for their day-to-day activities. It promotes user acceptance of ITAM as a business function by pushing the tools into the background and putting information in the foreground.

For more information:

Please contact us at info@revealitsolutions.com and we'll be happy to set up a demo and discuss how the *RevealIT Asset Viewer* can help you with your organizational goals.

The screenshot displays the 'Asset Viewer' web application. At the top, there are navigation tabs for 'Computer Assets', 'Software Installations', 'Software Licenses', 'Software Compliance', and 'Contracts'. Below these, there are search filters for 'Vendor' (Microsoft), 'Cost center' (907), and 'Expires before'. A 'Submit' button is present. The main area shows a table with 8 records. The table columns are Contract, Purpose, Expiry, Value, Cost Center, Vendor Name, and Administrator. Below the table, there is a 'Details' section for the selected 'Enterprise Enrollment' contract, showing fields for Contract, Vendor name, Nature, Purpose, Value, Comment, Term (Start, Expiry, Status), and Owner (Cost center, Admin first, Admin last).

Contract	Purpose	Expiry	Value	Cost Center	Vendor Name	Administrator
Enterprise Agreement	Enterprise Agreement	Mar 31, 2017	\$1,259,659.32	907	Microsoft	Carpenter
Enterprise Enrollment	Enterprise Enrollment	Mar 31, 2017	\$250,000.00	907	Microsoft	Carpenter
Maintenance Contract	Maintenance Contract	Sep 30, 2013	\$652,359.50	907	Microsoft	Carpenter
Microsoft BA	Microsoft Business Agreement	Mar 31, 2017	\$0.00	907	Microsoft	...
